Every New Yorker is interested in each move made by the New York Central to improve its magnificent service, and in the eyes of the average stranger, whether native or foreign, the New York Central is an example of what the Empire State of the Union can do.

We therefore note with pride the up-to-date character of the dining-car service on the great four-track line. In a menu on one of the afternoon trains from New York recently we noticed "broiled breast of prairie chicken, with currant jelly" among the list of delectable viands prepared for its patrons. Its pure spring water from the foothills of the Adirondack Mountains, served free, is another delightful idea and on the Empire State Express they are now serving almost every dish that you could get on an ala-carte dining car, and those dishes are hot and appetizing. Recently broiled bacon with eggs and broiled ham with eggs have been added to the menu.

This, it will be understood, is on a train where the travel is so heavy that it is almost imposeible to haul a dining-car, but with their new buffet broiler service the Central is handling it in splendid shape.—Albany Prems-Knickerbocker-Express.

Boston, Mass., Feb. 27.—Gunner James Morgan came up from Newport to-day and called on Admiral Sampson. He reported at the Navy Yard about 1:5, sent in his card by an orderly and was immediately given an audience with the Admiral. What transpired during the half hour they were together neither would say. Morgan seemed very cheerful when it was over, and later, when he met the Admiral in the yard and saluted. Admiral Sampson nodded recognition. The gunner spent some time with the Admiral's private secretary, and was shown through the Navy Yard by friends anxioute discuss the letter incident, but Mr. Morgan heard much and said little.

"I came to Boston voluntarily," he said, "to pay my respects to Admiral Sampson and to assure him of the deep distress I was caused by the unauthorized publication of certain correspondence, and because I knew the Admiral would be annoyed by the manner in which this correspondence was made public." Charles Morgan, Gun Captain of the croiser New York, whose promotion to Entign is objected to by Admiral Sampson on the ground that Morgan lacks the social graces which he believes a naval officer should have, was Gun Captain of the flagahip New York during the blockade and battle of Santiago. He was at the head of the force of divers which explored the wreck of the Maine in Havana Harbor in 1898, and was highly commended by naval officers for his excellent work in that connection. He is said to be one of the best divers in the navy. In the Maine work he made an average of seven hours a day under water, establishing a new record. Friends of Rear Admiral Sampson deplore the publication of his indorsement on Gunner Morgan's application for his recommendation, but they insist that his statements describe the exact situation. They call attention to-day to statements made by John Paul Jones and approved by General George Washington, which are almost identical with the views of Admiral Sampson.

"It is by no means enough that an officer of the navy should be a capable mariner." John Paul Jones declared; "he must be that of course, but also a great deal more. He should be as well a gentleman of liberal education, refined manners, punctillous courtesy and the nicest sense of personal honor. He should not only be able to express himself clearly and with force in his own language, both with tongue and pen, but he should also be versed in French and Spanish. The naval officer should be familiar with the principles of international law and the general practice of admiralty interpretance. He should also be conversant with the usages of diplomacy, and capable, if called upon, of maintaining a dignified and judicious diplomatic correspondence.

Visited Peoria Distillery.

At il o'clock this morning, in company with some of her reporter friends, Mrs. Nation visited the Great Western Distillery, which is the largest distillery in the world. It was the first time the crusader had ever gone through such a "devil's shop," as she called it.

Mr. Peter Casey, manager of the distillery, greeted Mrs. Nation in person, and received her very kindly. His kindness was all lost. The dauntless crusader poured out a most bitter tirade against the manager, calling him the "Devil's own agent," shaking her clenched fist in his face, and exhorting him to tear down "all this shop,"

The fact that his monthly salary is in four figures will probably pardon Mr. Casey in the eyes of the public for not obeying Mrs. Nation's demands. The manager was courteous under trying conditions, and introduced Mrs. Nation to the heads of the various departments, who, in turn, conducted the visitor through the entire plant, explaining fully the methods.

To only one thing did Mrs. Nation give approval. She was shown the cattle. Addressing them, she said: "You are treated better than the children of men. You are not fed upon that which intoxicates and kills."

The men who managed Mrs. Nation's lecture last night to-day refused to pay the 50 agreed upon. They contend that she broke her contract with them by speaking in the saloons and theaters. The crusader did not seem to care about losing the money. Financial profit is utterly remote from her mind. She bought 35 worth of fruit for the juli prisoners this afternoon, and had but a few cents in her purse when she left for Topeka.

Judge Caldwell in dissenting from this opinion cites a case called the Doon Township case, in which the Supreme Court rendered a decision against the township. Continuing, he says:

"The attitude of a majority of the court is an unseemly one. It is a distinct avowal that they will not be bound by the decisions of the Supreme Court of the United States, unless those decisions accord with their views of the law. If such judicial insubordination should be indulged in by all the inferior courts, the country would speedily be precipitated into a condition of judicial anarchy.

"The suggestion that the judgment of the Supreme Court in the Doon Township case is entitled to any less consideration because there was a strong dissent is wholly untenable. The judgment of the majority of the court has the same conclusive and binding force as iff it expressed the unanimous judgment of the court. mail cars over the Suburban tracks without provision for this service being included in the charter of the road. Mr. Jenkins appealed the case.

The trial was the second to which Mr. Jenkins has been subjected for running the mail cars, a decision having been handed down by Judge Jacobi of the Police Court a few days ago, wherein he was fined \$300. Mr. Jenkins asked for a trial by jury at the time, and yesterday's case was the result. The running of mail cars over the Suburban road extends back to last fall, when the mail service was first instituted. Marshal Secrest stopped the first cars over the road and an injunction, preventing his interference therewith, was applied for by the Suburban. The service has been continued under this injunction, and about \$600 warrants have been sworn out against Jenkins, all charging him with the same offense of violating the city ordinances.

The jury which handed down yesterday's verdict was headed by John O'Laughlin, who acted as foreman. Mr. Jenkins was placed under \$200 bond upon the insuance of yesterday's warrant, and the same amount of bond was exacted in the case of several other warrants.
